COMPUTERIZED SALES ACCOUNTING SYSTEM AT THE EMPLOYEE COOPERATIVE OF PT KABANA TEXTILE INDUSTRIES, under the guidance of Mr. Ichwan Kurniawan, M.Kom. and Mrs. Risqiati, M.Kom.

### **ABSTRACT**

*The Employee Cooperative of PT Kabana Textile Industries still uses manual transaction registration. The manual recording can affect the difference in balances, both the recordings made by the officers and the records made by the treasurer. This can come from manual calculations using a calculator tool. In addition, problems arise in terms of collecting receivables that are difficult to collect due to salaries that are often late in paying. To overcome these problems, it is necessary to design a computerized accounting system using the waterfall development method with the stages of communication, planning, modelling, construction and deployment. From this method, it realizes the Computerization of Sales Accounting System in employee cooperatives at PT Kabana Textile Industries which consists of managing sales, repayment, members, goods, accounts, journals, ledgers, sales reports, user settings, receivables limits and profiles. Computerized Sales Accounting System at PT Kabana Textile Industries Employee Cooperative has been tested using the GUI (Graphical UserInterface) testing method.*

Keywords : Computerized, Accounting, Selling, *waterfall* system development methods

KOMPUTERISASI SISTEM AKUNTANSI PENJUALAN PADA KOPERASI KARYAWAN PT KABANA TEXTILE INDUSTRIES, dibawah bimbingan Bapak Ichwan Kurniawan, M.Kom. dan Ibu Risqiati, M.Kom.

### **ABSTRAK**

*Koperasi Karyawan PT Kabana Textile Industries masih menggunakan pencatatan transaksi secara manual. Pencatatan manual tersebut dapat mempengaruhi perbedaan saldo baik pencatatan yang dilakukan petugas maupun pencatatan yang dilakukan oleh bendahara. Hal tersebut bisa berasal dari perhitungan manual menggunakan alat bantu kalkulator. Selain itu, permasalahan muncul dari sisi penagihan piutang yang sulit ditagih dikarenakan gaji yang sering terlambat dibayarkan. Untuk mengatasi permasalahan tersebut perlu dirancangnya komputerisasi sistem akuntansi menggunakan metode pengembangan waterfall dengan tahapan communication, planning, modelling, construction dan deployment. Dari metode tersebut mewujudkan Komputerisasi Sistem Akuntansi Penjualan di Koperasi Karyawan pada PT Kabana Textile Industries yang terdiri dari pengelolaan penjualan, pelunasan, anggota, barang, akun, jurnal, buku besar, laporan penjualan, pengaturan pengguna, limit piutang dan profil. Komputerisasi Sistem Akuntansi Penjualan Pada Koperasi Karyawan PT Kabana Textile Industries sudah teruji menggunakan metode pengujian GUI (Graphical UserInterface).*
