

ABSTRAKSI

SISTEM INFORMASI LAYANAN PENDIDIKAN BERBASIS WEB DI SMP NEGERI 6 PEKALONGAN STUDI KASUS LAYANAN PARENTING, KONSELING, DAN REKAP KEHADIRAN SISWA

Dibawah bimbingan Devi Sugianti, M.Kom. dan Risqiati, M.Kom.

Penelitian ini membahas Sistem Informasi Layanan Pendidikan berbasis web di SMP Negeri 6 Pekalongan sebagai solusi atas permasalahan pengelolaan layanan pendidikan non akademik, yang meliputi pencatatan data layanan konseling yang masih dicatat secara manual, keterbatasan komunikasi dalam layanan parenting, belum tersedia jadwal layanan konseling yang dapat diakses oleh siswa dan orang tua, serta rekap kehadiran siswa yang belum terintegrasi sehingga sulit dipantau secara real-time. Penelitian ini bertujuan untuk mengimplementasikan Sistem Informasi Layanan Pendidikan Berbasis Web yang mendukung pengelolaan layanan parenting, konseling, dan rekap kehadiran siswa secara efektif dan efisien. Metode pelaksanaan yang meliputi identifikasi masalah, analisis kebutuhan sistem, solusi teknologi, implementasi hosting, uji coba, pelatihan pengguna, monitoring, dan evaluasi. Hasil penelitian menunjukkan sistem yang dikembangkan mempermudah guru BK dalam mengelola jadwal bimbingan konseling serta riwayat konseling dan parenting, memudahkan siswa dan orang tua dalam mengajukan layanan serta memantau kehadiran siswa, serta mendukung kepala sekolah dalam memantau rekap kehadiran siswa. Kesimpulan dari penelitian ini menunjukkan bahwa sistem informasi layanan pendidikan berbasis web mampu meningkatkan transparansi layanan pendidikan di SMP Negeri 6 Pekalongan. Adapun saran yang diajukan adalah pengembangan sistem lebih lanjut dengan pengembangan aplikasi mobile guna mendukung penyelenggaraan layanan pendidikan di SMP Negeri 6 Pekalongan secara lebih efektif dan berkelanjutan.

ABSTRACT

WEB BASED EDUCATIONAL SERVICE INFORMATION SYSTEM AT STATE MIDDLE SCHOOL 6 PEKALONGAN CASE STUDY OF PARENTING SERVICES, COUNSELING, AND STUDENT ATTENDANCE RECAPITULATION

Under the guidance of Devi Sugianti, M.Kom. and Risqiati, M.Kom.

This research discusses the web-based Education Services Information System at SMP Negeri 6 Pekalongan as a solution to the problems of managing non-academic education services, which include recording counseling service data which is still recorded manually, limited communication in parenting services, not yet providing a counseling service schedule that can be accessed by students and parents, as well as student attendance recaps that are not yet integrated so it is difficult to monitor in real-time. This research aims to implement a Web-Based Education Services Information System that supports the management of parenting services, counseling and student attendance recaps effectively and efficiently. Implementation methods include problem identification, system requirements analysis, technology solutions, hosting implementation, testing, user training, monitoring and evaluation. The research results show that the system developed makes it easier for guidance and counseling teachers to manage counseling guidance schedules as well as counseling and parenting history, makes it easier for students and parents to apply for services and monitor student attendance, and supports school principals in monitoring student attendance recaps. The conclusion of this research shows that the web-based education service information system is able to increase the transparency of education services at SMP Negeri 6 Pekalongan. The suggestion put forward is further system development by developing mobile applications to support the delivery of educational services at SMP Negeri 6 Pekalongan more effectively and sustainably.
